

## Enhance New Approaches in BioBased Local Innovation Networks for Growth

**PRESS RELEASE**

**July 2019**

### **H2020 ENABLING Project - Coaching Services**

**The Enabling Coaching Services, available through an online simple questionnaire provided via the website, will support biomass producers or the BBP industry for the uptake of emerging best practices and help the applicants figure out more details about the bioeconomy and its component. The applicant can ask about biomass, bio-based products, innovation & technologies, scientific papers, EU and national laws, and much more.**

The applicant can now join the [ENABLING Coaching Activities](#) and choose his preferred language (Bulgarian, Czech, Dutch, English, Italian, German, Greek, Norwegian, Hebrew and French). One of our partners will reach out within 5 working days and assist the applicant with their best resources for the time needed.

More information on ENABLING can be found on the [Enabling Project website](#) and Enabling social media ([LinkedIn](#), [Twitter](#)).
